

## Problem Solving PowerPoint Guide

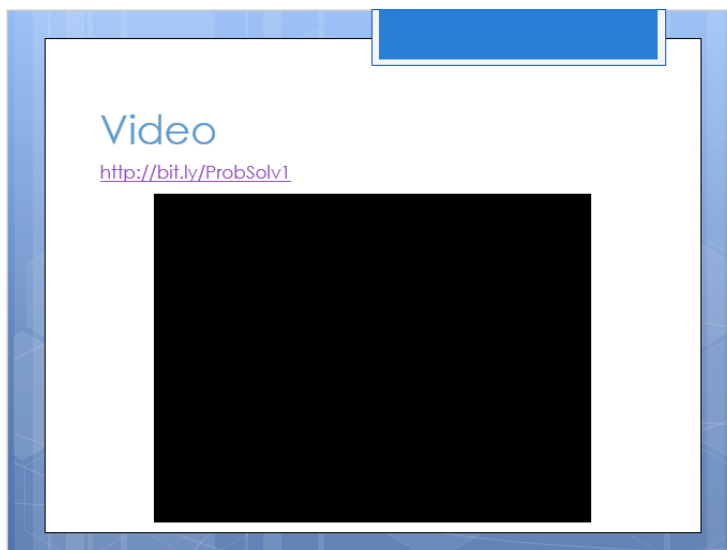

1. Open the *Problem Solving* PowerPoint. A window will open titled “Security Alert”, check “Enable external content for this session” and click ok.

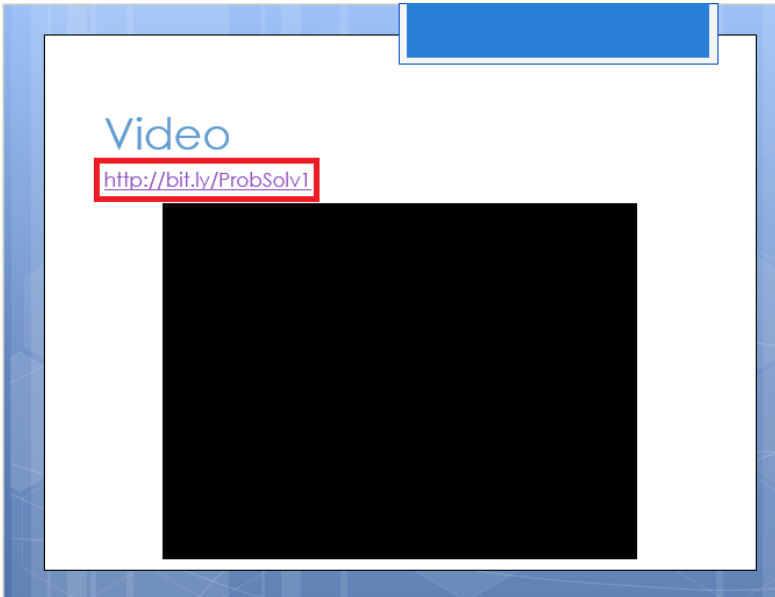

2. Enter presentation mode by clicking “Slide Show” in the menu bar and then clicking “From Beginning”

3. Slides with embedded videos will look like this when first opened. Wait 30 seconds for the video to load. Then click play.

4. If the video does not load, click the hyperlink directly above the video. The video will automatically open in your internet browser.

5. If the video does not open, open your internet browser and type the URL into your internet address bar and hit enter. The video will then load.
